

# BRITISH FIGHT WAY TO OPEN COUNTRY BEHIND THE HINDENBURG LINE, WHILE GERMAN FLANKS ARE BEING TURNED

## Breach Driven Through German Defenses South of Beaurevoir Measures Five Miles and 4,000 Prisoners Were Taken in the Movement

## GERMANS STILL RETREAT ON THE LILLE FRONT

### Tanks and Cavalry Are Expected to be Poured Through the Gap and Come Into the Rear of Laon and Cambrai Positions

(By the Associated Press.)

Northeast of St. Quentin the British to-day are reported fighting their way into the open country beyond the Hindenburg line, after having pushed ahead five miles since Monday. From Lens northward and from Rheims eastward to the Argonne the allies continue to bend back the German flanks. The breach driven through the German defenses south of Beaurevoir is on a front of five miles. To the north the British are plunging forward east-southeast from Le Catelet, while on the south the French are attacking successfully between Sequehart and Lesdins. The German resistance is bitter but there has been no let-up in the strong allied pressure. In the fighting in this area Thursday, Field Marshal Haig's men captured 4,000 prisoners.

With the British in the open country northeast of St. Quentin and the cavalry and tanks pouring through the breach, the German positions about Cambrai and Laon will become most precarious. Through the opening in the line, Marshal Foch would be able to throw troops to take both Cambrai and Laon in the rear. West of Lille the British continue to press the Germans eastward while extending their line south of Lens to Mericourt, where a substantial advance also has been made. Between Lens and Armentieres, the British have advanced an average of more than three miles on a 20-mile front, and east of the Bois Grenier are within six miles of the fortress of Lille. Meanwhile the British and Belgians in Flanders are widening the salient east of Ypres, which threatens the German positions on the coast and the network of railroads west of Ghent.

There are no indications that the Germans have halted their retirement in the Lille salient. The enemy still is several miles west of the Deule canal, which runs from north of Armentieres through Lille to north of Lens, and which probably will form part of the German defense system before Lille.

Around Rheims and east of the Suippe, Generals Berthelot and Gouraud are now drawing closer the sides of the German salient east of Rheims. American troops have joined the French in their operations east of the Suippe and have assisted in the advance northwest of Somme, capturing the strong positions of Blanc Mont and the Meuse farm. Farther east the French have taken Orfouille and Bemoit Chateau. North of Rheims the French are working their way across the Aisne canal. It appears that unless the Germans withdraw from the Champagne salient they are in danger of being caught in a trap between the armies of Berthelot and Gouraud.

## NEARING STRATEGIC RAILROADS.

### Allies Threaten Germans in Central Champagne.

French Headquarters in France, Oct. 3.—(Reuters'.)—With the progress of the allies along the front from the Aisne to the Meuse, the Germans daily are becoming more alarmed over their situation in central Champagne between Rheims and Moronvilliers heights. Allied forces daily are nearing the lateral railways which permit the enemy to move his reserves. During the past two days the advance of the allies has made his route from the Argonne along the Aire valley useless except by night. His next line of communication is twelve miles north.

In this sector, however, the allies have to deal with the German crown prince, who does not desire to be the first German commander to give the order to retreat.

General Gouraud's army had and still has the hardest task of all the French armies. A number of feats of individual courage are reported. A French soldier with an automatic rifle captured a

## BRITISH SMASHED ENTIRE DEFENSES

### London Motor Buses Are Hurrying the British Soldiers Through the Gap After Retreating Germans.

With the British Forces in the St. Quentin Sector, Thursday, Oct. 3 (by the Associated Press).—British forces broke through the entire Hindenburg defense system in the neighborhood of Fresnoy to-day. Cavalry forces followed the "shipper" tanks and armored cars swept through. Fresnoy is reported to have been taken soon afterward.

Allied airplanes report there are only one or two thin held and hurriedly built trench lines in front of the advancing British.

The entire German positions north and south of St. Quentin are gravely menaced. Infantry and masses of machine guns poured through the break.

The enemy appears to be in full flight north of the gap. Allied patrols have penetrated farther into Cambrai, from which the Germans seem to be withdrawing.

There was desperate fighting. Fresh troops were poured into the battle. Prospect hill, a strong enemy position, was taken by storm. Many Germans were killed. Trenches were turned into shambles.

The Germans counter-attacked against Coudy and Le Catelet.

New British attacks were launched and desperate fighting still is in progress. Prisoners from 10 German divisions and 41 battalions were captured to-day and regiments from Flanders and Verdun were identified.

Last available air reports are to the effect that the advancing British troops are 6,000 yards beyond the Beaurevoir line. Machine guns are said to have poured through the breach in the Hindenburg system aboard motor buses formerly operating in London. They followed the cavalry closely.
